Fixed bollards with ground anchor

The ultimate protection for buildings and pedestrian areas

The fixed bollards of the **PF Series** with ground anchors are designed to provide a solid and resistant barrier—perfect for protecting buildings, squares, pedestrian zones, and **areas closed to vehicle traffic**.

Thanks to the anchoring structure, they are embedded directly into the ground, offering **strength with quick installation**.

- **Permanent protection** without the need for electrical power
- **Ideal for buildings, pedestrian areas**, and zones closed to vehicle traffic
- **Surface customisation of the cylinder cover**, e.g. with a city crest or a logo
- **Compact height** for discreet protection.

Smart! Choose the cylinder color that matches the surroundings **for a more harmonious solution!**

Standard configuration

The standard configuration of our systems is designed to ensure efficiency, safety and ease of management. The configuration includes:

- **Anthracite grey painted steel bollard**, a device for controlling vehicle access with **anchors** for ground fitting.
